

Ubuntu Pro for Azure

For production workloads and professional users

Ubuntu Pro for Azure is a premium image designed by Canonical to provide additional coverage for production environments running in the cloud. It includes security and compliance services, enabled by default, in a form suitable for small to large-scale Linux enterprise operations — with no contract needed.

Key features include live kernel patching, which provides instant security and longer uptimes, broad security patching of major open source workloads for production use, and certified components for FedRAMP, HIPAA, PCI and ISO use cases. Ubuntu Pro is backed by a 10-year maintenance commitment by Canonical.

Like Ubuntu, it features an optimized Azure kernel, with improved boot speed, outstanding runtime performance and advanced device support to match features present in every Azure VM instance type. Canonical publishes images on a daily basis, ensuring security is built-in from the moment an instance launches, and provides content mirrors in every region to avoid the need to go across regions or out to the Internet for updates.

Ubuntu Pro for Azure is priced based on the core count of the Azure VM instance, starting at \$0.01 for single-core instances. The table below covers Central US region pricing for the common instance types:

Instance	Category	Cores	RAM	Azure Cost	Pro Cost	Total hourly
B1MS	Standard	1	1GB	\$0.025	\$0.010	\$0.035
DS2V3	General Purpose	2	8GB	\$0.110	\$0.020	\$0.132
DS3v2	General Purpose	4	14GB	\$0.293	\$0.040	\$0.333
DS13v2	Memory Optimized	8	56GB	\$0.741	\$0.067	\$0.808

Ubuntu on Azure

Canonical, the publisher of Ubuntu, offers images carefully optimised to work on scale in public cloud environments. Cloud innovators choose Ubuntu to run their mission-critical workloads, including Netflix, Paypal, Heroku and Acquia.

Ubuntu Pro is a production-focused image which includes subscriptions to enterprise services including kernel Livepatch, certified components and the broadest security coverage in the industry.

Ubuntu is the public cloud image of choice, used and trusted by millions of developers to innovate on modern workloads.

Available today on the Azure Marketplace: Ubuntu Pro [18.04 LTS](#) | [16.04 LTS](#) | [14.04 LTS](#)

Feature Matrix

Feature ¹	Ubuntu	Ubuntu Pro	Ubuntu Advantage
Security patches for 2,400+ Ubuntu infrastructure packages	✓	✓	✓
Security patches for 26,000+ open source packages, including Python, Ruby, PHP and Node.js ecosystems and applications such as Apache Kafka, MongoDB, RabbitMQ and Redis	-	✓	With Apps add-on
Livepatch for instant kernel security and higher uptimes	-	✓	✓
FIPS 140-2 and Common Criteria EAL2 certified components	-	✓	✓
Hardening profiles, including CIS and DISA STIG	-	✓	✓
Landscape fleet management	-	SAAS	SAAS and Hosted options
Maintenance period	5 years	10 years	10 years
Knowledge Base	-	-	✓
Canonical-backed support with enterprise grade SLA	-	-	Up to 24x7, 1-hour response

¹ 18.04 LTS certifications are in-progress and will be available 2020Q1. Certified components and kernel live patches are not available for Ubuntu 14.04 LTS. Maintenance commitment for Ubuntu 18.04 LTS onwards is 10 years; for 14.04 LTS and 16.04 LTS, it is 8 years.

Key Benefits

All-inclusive Patching

Over 28,000 supported packages available in Ubuntu, including thousands of open-source applications, securely patched with Ubuntu Pro.

Security & compliance focus

Critical patches delivered automatically for up to 10 years. Key security updates, including Kernel Livepatch, seamlessly applied to increase uptime and avoid the need for unscheduled reboots. FIPS 140-2 and CC-EAL certifications and systems management at scale to ensure continued security and compliance.

Flexibility & upstream access

Up-to-date access to open source with the flexibility to fit your infrastructure, with consumption-based managed services options and no vendor lock-in.
