# ubuntu®

## Ubuntu Pro for AWS

For production workloads and professional users

Ubuntu Pro for AWS is a premium AMI designed by Canonical to provide additional coverage for production environments running in the cloud. It includes security and compliance services, enabled by default, in a form suitable for small to large-scale Linux enterprise operations offering pay-as-you-go billing on your existing AWS invoice.

Key features include live kernel patching, which provides instant security and longer uptimes, security patching of major open source workloads for production use, and certified components for FedRAMP, HIPAA, PCI and ISO use cases. Ubuntu Pro is backed by a 10-year maintenance commitment by Canonical.

Like Ubuntu, it features an optimized AWS kernel, with improved boot speed, outstanding runtime performance and advanced device support to match features present in every AWS EC2 instance type. Canonical publishes images on a daily basis, ensuring security is built-in from the moment an instance launches, and provides content mirrors in every region to avoid the need to go across regions or out to the Internet for updates.

Ubuntu Pro for AWS pricing is based on a proportion of the underlying EC2 compute spend, starting at 20% for the smallest instance sizes, and ramping down to less than 1% for the largest instances available. On-Demand, 1-year Reserved Instance and 3-year Reserved Instance purchasing options are available, and it's included in <u>AWS Free Tier</u>, which lets you try before you buy.

Pricing for US East (N. Virginia) Region	EC2 Cost hourly	Ubuntu Pro hourly	Total hourly
t3.nano	\$0.005	\$0.001	\$0.006
t3.medium	\$0.042	\$0.009	\$0.051
c5.large	\$0.085	\$0.019	\$0.104
r5.xlarge	\$0.252	\$0.046	\$0.298

## Ubuntu on AWS

Canonical, the publisher of Ubuntu, offers images carefully optimised to work on scale in public cloud environments. Cloud innovators choose Ubuntu to run their missioncritical workloads, including Netflix, Paypal, Heroku and Acquia.

**Ubuntu Pro** is a productionfocused image which includes subscriptions to enterprise services including kernel Livepatch, certified components and the broadest security coverage in the industry.

**Ubuntu Minimal** is a stripped down edition of Ubuntu aimed at workload-specific use cases such as containers, single-function VMs and serverless, delivered as an AMI which is 100MB and 150 packages smaller, offering a reduced attack surface.

**Ubuntu** is the public cloud image of choice, used and trusted by millions of developers to innovate on modern workloads.

Available today on the <u>AWS Marketplace</u>: Ubuntu Pro <u>20.04 LTS | 18.04 LTS | 16.04 LTS | 14.04 LTS</u>

If you are interested in having an onboarding presentation, please contact <u>customersuccess@canonical.com</u> a Canonical representative will arrange one for you.

## Feature Matrix

Feature <sup>1</sup>	Ubuntu	Ubuntu Pro	Ubuntu Advantage
Security patches for Ubuntu infrastructure components	♥	♥	♥
Security patches for hundreds of open source applications, including Apache Kafka, MongoDB, RabbitMQ, Redis and NodeJS	-	•	-
Kernel Livepatch for instant security and higher uptimes	-	•	♥
FIPS 140-2 and Common Criteria EAL2 certified components	-	⊘	•
Automated security profiles, including CIS and DISA STIG	-	♥	♥
Integration with AWS security and compliance features, including Security Hub, CloudTrail and more	-	Coming soon	-
Knowledge Base	-	-	
Maintenance period	5 years	10 years	10 years
Canonical-backed support with enterprise grade SLA	-	_	Up to 24x7, 1-hour response

## Key Benefits

#### All-inclusive Patching

More than 30,000 supported packages available in Ubuntu as well as thousands of open-source applications securely patched and supported by Canonical.

#### Security & compliance focus

Critical patches delivered automatically for up to 10 years. Key security updates, including Kernel Livepatch, seamlessly applied to increase uptime and avoid the need for unscheduled reboots. FIPS 140-2 and CC-EAL certifications and systems management at scale to ensure continued security and compliance.

#### Flexibility & upstream access

Up-to-date access to open source with the flexibility to fit your infrastructure, with consumption-based managed services options and no vendor lock-in.

### Need access to our solutions?
